| Table        | Field                      | Update field name  | Constant  | Meaning   | Notes |
|--------------|----------------------------|--------------------|---|---|-------|
| tblDocument  | DocumentId                 |                    | N   | Primary identifier  |       |
| tblDocument  | DocumentGeneralCitation    |                    | N   | Human readable citation for the document  |       |
| tblDocument  | DocumentStatus             |                    | N (No PDF   No Pages   Completed)                                 | Status indicates whether there was no PDF, no pages, or has both PDF and pages                                    |       |
| tblDocument  | DocumentIsCopyrightGranted |                    | N (0 = 1461, 1 = 11395)   | Indicates whether permission was able to be obtained from the copyright holder. 0 being no and 1 is yes           |       |
| tblDocument  | DocumentIsPDF              | DocumentIsPdf      | N (0 = 69, 1 = 12786)   | Indicates the presence of a PDF document. 0 being no and 1 is yes   |       |
| tblDocument  | DocumentScanQuality        |                    | N (" = 2283; C1 = 10; C2 = 359; C3= 10; D1=5792; E = 1; E1 = 440) | Indicates the scan quality of the document. No information is available on the meaning of the quality codes used. |       |
|              |                            |                    |   |   |       |
| tblReference | GUID                       | DocumentId         | N   | Document Id   |       |
| tblReference | BugsID                     | BugsId             | N   | Identifier for references within the Bugz data set  |       |
| tblReference | Citation                   |                    | N   | Bibliography citation of the resource as a text value   |       |
| tblReference | Title                      |                    | N   | Title as a text value   |       |
| tblReference | Author                     |                    | N   | Author as a text value  |       |
| tblReference | Author1                    |                    | N   | Author as a text value  |       |
| tblReference | author2                    | Author2            | N   | Author as a text value  |       |
| tblReference | author3                    | Author3            | N   | Author as a text value  |       |
| tblReference | author4                    | Author4            | N   | Author as a text value  |       |
| tblReference | author5                    | Author5            | N   | Author as a text value  |       |
| tblReference | author6                    | Author6            | N   | Author as a text value  |       |
| tblReference | author7                    | Author7            | N   | Author as a text value  |       |
| tblReference | author8                    | Author8            | N   | Author as a text value  |       |
| tblReference | author9                    | Author9            | N   | Author as a text value  |       |
| tblReference | author10                   | Author10           | N   | Author as a text value  |       |
| tblReference | author11                   | Author11           | N   | Author as a text value  |       |
| tblReference | Date                       |                    | N   | Date of publication   |       |
| tblReference | Year                       |                    | N   | Year of publication   |       |
| tblReference | PagePart                   |                    | N   | Pages used  |       |
| tblReference | SourceAbb                  | SourceAbbreviation | N   | Abbreviation of document source   |       |
| tblReference | SourceFull                 |                    | N   | Full document source  |       |
| tblReference | Scanned                    |                    | N - there are a few different options                             | Indicates whether the document was scanned.   |       |
| tblReference | ScanQuality                |                    | N - there are a few different options                             | Indicates scan quality of document  |       |
| tblReference | BookJournal                |                    | N   | Book journal where document has been added  |       |

|                   |                      |                      |   |   |                              |
|-------------------|----------------------|----------------------|---|---|------------------------------|
| tblReference      | CopyrightApproval    |                      | N - a few different options                                   | Permission or not to use owner's creative material                          |                              |
| tblReference      | Organisation         |                      | N   | Organisation where contact person resided                                   |                              |
| tblReference      | Comment 1            | Comment              | N   | Comments about the document   |                              |
| tblReference      | Comment 2            |                      | N - Mostly null except for three records                      | Comments about the document   |                              |
| tblReference      | Pkey                 | PKey                 | N   | Primary identifier  |                              |
|                   |                      |                      |   |   |                              |
| tblPage           | DocumentID           | DocumentId           | N   | Document Id   |                              |
| tblPage           | PageNumber           |                      | N   | Bugz website page number  |                              |
| tblPage           | PageActualPageNumber |                      | N   | Actual page number of document  |                              |
| tblPage           | PageStatus           |                      | N - Empty or 'Page added by mrf - Tuesday, 22 September 2009' | Text statement indicating when the document was added /updated. Incomplete. |                              |
| tblPage           | PageImageFileName    | PageImageFilename    | N   | Filename of image, pdf, and rtf files                                       |                              |
| tblPage           | PageRTFText          | PageRtfText          | N   | RTF text extracted from PDF   |                              |
| tblPage           | PagePK               | PKey                 | N   | Primary identifier  |                              |
|                   |                      |                      |   |   |                              |
| tblPageSearchTerm | DocumentID           | DocumentId           | N   | Document ID as GUID   |                              |
| tblPageSearchTerm | PageNumber           |                      | N   | Page number   |                              |
| tblPageSearchTerm | id                   | PKey                 | N   | Primary identifier  |                              |
| tblPageSearchTerm | SearchTermNameBankID | SearchTermNameBankId | N   | Search term name bank ID as an integer                                      | Extracted from tblSearchTerm |
| tblPageSearchTerm | SearchTermText       |                      | N   | Scientific search term name as text value                                   | Extracted from tblSearchTerm |
